

# 100% JEUNES

## BELGIUM

"My passion is education. However, because of my height, no one has ever given me the chance to work with children – especially those who are taller than me.

However, the support provided by 100% jeunes encouraged me to feel confident to pursue my goals. Today, I have worked for 3 months in a school where I manage a team, take care of children and train new educators.

100% jeunes helped me to regain my confidence in my abilities and to embrace responsibilities that are even greater than what I could have hoped for my life."

**100% JEUNES** works to empower young people who have experienced social isolation to regain confidence in themselves and their institutions.

The project delivers a number of workshops based on sports, empowerment, cultural visits and role model lectures. 100% jeunes also works as part of a multi-disciplinary team to ensure that each participant has access to housing, legal, administrative and family advice.

One of the greatest impacts of 100% jeunes has been the support provided by the project to enable each participant to deliver upon a desired project – whether that's professional or personal.
