OUR DIGITAL FUTURE
EU, CANADA

"Our Digital Future's Thinkathon project has had such a wonderful impact on my life. It has transformed the way I approach work.

I had no idea what digital inclusion was and how important it is to creating a better society.

Having the opportunity to shape our society and politics in both Europe and Canada gave me the confidence to believe that I can make my mark on policy."

Our Digital Future's Thinkathon programme aims to join European and Canadian youth together in order to have a more aligned and digitally inclusive future.

Through encouraging participants to develop ideas and policy recommendations for EU and Canadian policy makers on the important topics of today, Thinkathon are making sure that young people's voices are heard.

200 participants from Brussels, Montreal, Milan and Edmonton have taken part in two online sessions. Focussing on citizenship and social relations, young people in Europe and Canada are being encouraged to think big and empowered to be the drivers of change nationally and internationally.
