SOCIAL SEED
ITALY, SPAIN, GERMANY, POLAND

"Unemployment and poverty has reached all corners of the European Union. Social Seed views entrepreneurship as one way of escaping the cycle.

We are at a key moment in time when the knowledge economy offers new opportunities for prosperity. We can unleash this potential through training and offering support to people at risk of social exclusion and provide opportunities to sow seeds for a fruitful economic and social growth."

Social Seed aims to harness the entrepreneurship potential of socially excluded groups. Through bringing together social entities, companies, managers and people at risk of exclusion, Social Seed has created an innovative hybrid model of collaboration.

The project has selected 15 entrepreneurs from socially excluded backgrounds and is working with them to provide training and to create business models which can be put into action alongside multiple partners.

Project participants are beginning to reap the rewards of inclusive and sustainable economic growth.
